

RECALL OF KTM 790 ADVENTURE MODELS OF MODEL YEAR 2019 and 2020: REPLACEMENT OF PISTON RETURN SPRING FOR FRONT MASTER CYLINDER

Valid for all markets

KTM recalls KTM 790 ADVENTURE models of model year 2019 and 2020 to the workshops of authorized KTM dealers in order to replace the piston return spring for the front master cylinder.

The preload force of the return spring may, in individual cases, lie outside the specified tolerance. This can result in the brake piston not being returned to its original position, which in rare cases can impair the function of the front brake. For this reason, the return spring must be replaced on the above-mentioned vehicles.

Customers to whom the affected motorcycles have already been delivered are being personally informed by letter and are asked to immediately contact an authorized KTM dealer to arrange an appointment for replacement. In addition, customers can check online in the "Service" area on the KTM website if their motorcycle is affected by the recall.

The replacement of the piston return spring for the front master cylinder takes approximately 35 minutes. The replacement can be carried out by authorized KTM dealers only. This replacement of the piston return spring for the front master cylinder is a free-of-charge service for customers performed under warranty.
